EDUCATION

Bapatla Engineering College **August 2018 - May 2022**.

Bachelor of Technology in Computer Science and Engineering 8.30/10.00.

Relevant Coursework: Machine Learning, Big Data Analytics, Object Oriented Programming Concepts, Data Structures, Algorithms and Paradigms, Data Models for DBMS, Data Base Management Systems, Natural Language Processing, Full Stack Development.

EXPERIENCE

Open-Source Contributions (GirlScript Summer of Code Gssoc'25) **July 2025 - Present**

- Delivered enhancements to 5+ open-source projects through feature development and UI/UX optimization.
- Collaborated on GitHub by doing PRs to resolve 7 issues in different projects.

Data Analyst Intern, MeriSKILL, Remote, India. **May 2024 - June 2024**.

- Designed interactive Tableau dashboards to visualize HR metrics, leading to a 30% improvement in decision-making efficiency.
- Generated 4 user-friendly dashboard on "HR Analytics" using Tableau to display key metrics and insights.
- Illustrated 6 critical KPIs through Donut Charts, Level of Detail (LOD) Expressions, and Bar-in-Bar charts to enhance data insights.

Data Analyst Intern, Mentorness, Remote, India. **April 2024 - May 2024**.

- Gained expertise in Data Analysis by doing 2 projects using MySQL and Tableau
- Executed complex MySQL queries on 7 interconnected tables to derive actionable insights for optimizing game performance.
- Optimized database queries, reducing query execution time by 40%, improving data retrieval efficiency.

ASE - Trainee, Tata Consultancy Services, Hyderabad, India. **August 2022 - August 2023**.

- Collaborated with a team of 7 to create a prototype Fitbit-style smart wearable that detects seizures and automatically sends emergency alerts to nearby hospitals.
- Developed a mobile application for a prototype smartwatch to monitor health-related data, assisting individuals during seizures and boosting usage potential by 50%.

SKILLS

Languages / Databases: Python, Java, C, JavaScript, MySQL, SQLite, Linux.
Web Development: HTML, CSS, BootStrap, React.Js, Node.Js, Express.Js
Data & Cloud: AWS, Hadoop, Spark, MongoDB, NLP, Data Cleaning, Wrangling, Analysis, Management.
Tools: Git, GitHub, GitHub Desktop Visual Studio, Tableau, MySQL Workbench, Microsoft Excel, Jupyter Notebook.

PROJECTS

Multi-Class Sentiment Analysis on Text (*NLP, Sentiment Analysis, 93.29% accurate*)

- Partnered with a team of 4 to deploy a pretrained BERT model for multiclass sentiment analysis on movie reviews, improving classification accuracy through data preprocessing and fine-tuning.
- Attained 93.29% model accuracy in multi-class sentiment classification leveraging BERT-based natural language processing.

Ecommerce Clothing website (*MERN Stack, LocalStorage (~5MB limit), Vercel, Tailwind CSS*)

- Created a full-stack ecommerce platform for clothing products with secure user authentication for 100+ users.
- Integrated 10+ RESTful APIs for products, users and admin; used Axios for frontend-backend communication.

Wicky Candles Website (*Next.Js, JavaScript*)

- Built a full-stack Next.js e-commerce site with authentication, product browsing, and admin dashboard.
- Implemented product management and order tracking for a seamless shopping experience.

Certificates/Courses

- Qualified GATE-2025 CS/IT paper.
- MERN Stack Developer course - NxtWave
